ERDE

The background image shows a large elephant in a savanna landscape. The elephant is the central focus, with its trunk and legs visible. A large, white, stylized letter 'E' is superimposed over the elephant's body. The landscape is a mix of brown and green, with some rocks and sparse vegetation. In the top right corner, there is a decorative pattern of overlapping, faceted shapes in shades of brown and gold.

ERDE

Erde, das feste Element, durchdrungen von einer unschätzbaren Vielzahl an Lebewesen, Organismen und Teilchen. Sie ist vielschichtig und gibt jedem Menschen, jedem Tier und jeder Pflanze den Nährboden täglichen Wachstums und Sicherheit.

Erde gibt Halt. Sie steht für Standfestigkeit und ist robust. Kühl in der Oberfläche und doch flüssig und heiß im Kern. Vielseitig. Fassbar.

Erde ist energieabsorbierend und federnd. Jedoch ebenso hart und steht für Bodenständigkeit, Treue und Substanz. Sie verändert sich. Sie bewegt sich. Sie lebt.

Earth, the earth element pervaded with a multitude of living beings, living organisms and particles. The soil is multi-layered and provides the substrate for daily growth and safety for each human, each animal and each plant. Earth provides stability.

Earth stands for stability and is resilient. Cold on the surface yet still fluid and hot in the core. Versatile. Physical.

Earth is energy-absorbing and flexible. However hard and stands for groundedness, loyalty and substance. It changes. It moves. It lives.
